To Whom It May Concern,

I am pleased to recommend Matthew for any Quality Assurance Engineering role. I had the opportunity to work closely with Matthew while serving as his Group Engineering Manager at Veterans United Home Loans, and throughout our time working together he consistently demonstrated exceptional technical ability, a strong quality mindset, and outstanding collaboration skills.

Matthew's greatest strength is his holistic vision of quality. He understands that quality extends far beyond finding defects or verifying requirements. He regularly asked thoughtful, challenging questions that helped teams identify risks, clarify expectations, and improve solutions before they reached customers. His ability to think critically about products, processes, and user needs elevated both the quality of our software and the effectiveness of our development practices.

One of the qualities I most appreciated about Matthew was his commitment to representing the customer's perspective. He looked beyond functional correctness to consider usability, visibility, accessibility, and the overall customer experience. This broader perspective made him a trusted partner to engineers, product owners, and stakeholders throughout the development lifecycle.

Matthew made a significant impact on the maturity of our quality practices. He helped advance our automation efforts and developed tools, processes, and standards that improved consistency across the team. He played an important role in establishing quality expectations through Jira story templates and quality-focused discussions, helping ensure that quality considerations were incorporated early in the development process rather than addressed at the end.

In addition to his direct contributions, Matthew excelled at knowledge sharing and enablement. He invested considerable effort into training team members, documenting processes, and preparing thorough handoffs that positioned the team for continued success. His willingness to teach others and share what he had learned increased the overall capabilities of the team and ensured that improvements were sustainable.

Matthew also collaborated effectively with other Quality Assurance Engineers to align practices and maintain consistent standards across teams. He was receptive to feedback, quick to adapt, and committed to continuous improvement. He consistently balanced

strong personal ownership with a collaborative mindset, making him an effective partner in cross-functional environments.

Beyond his professional accomplishments, Matthew was a tremendous contributor to team culture. He quickly built strong relationships, brought positivity and authenticity to every interaction, and made those around him better. He was approachable, supportive, and genuinely invested in the success of both the team and the individuals he worked alongside.

Matthew is the type of professional who leaves an organization stronger than he found it. His combination of technical quality expertise, customer-focused thinking, process improvement leadership, and collaborative spirit make him an exceptional Quality Assurance Engineer and teammate.

I recommend Matthew without reservation and would welcome the opportunity to work with him again in the future. Please feel free to contact me if you have any questions regarding his qualifications or contributions.

Sincerely,

A handwritten signature in black ink, appearing to read "Nathan Gearke". The signature is fluid and cursive, with the first name "Nathan" being more prominent than the last name "Gearke".
